The ACBIS program provides the opportunity to learn important information about brain injury, to demonstrate learning in a written examination and to earn a nationally recognized credential.

CBIS Curriculum – The Certified Brain Injury Specialist training covers the following topics:

- TBI and diagnostic imaging
- Medical, physical, cognitive, neurobehavioral and psychosocial consequences of injury
- TBI in pediatrics and adolescents, as well as aging with a brain injury
- Concussions and mTBI, as well as disorders of consciousness
- Rehabilitation philosophy, outcome measurement and care management
- Effect of injuries on families
- Cultural, gender and sexuality issues
- Military populations
- Neuropsychology
- Participation and return to work

TRAINERS:

John Pimentel, CBIST John is a Certified Brain Injury Specialist Trainer (CBIST) with over fifteen years of certified professional experience in community based/residential rehabilitation programs geared to provide rehabilitative services to people living with brain injury. John has ample knowledge in operational management (clinical/administrative) as well as development and implementation of new services.

Michael Langford, CBIS Michael is the ARCA Neuro Director. During his 35 years working with adults and children with disabilities, he has developed and managed programs in residential, day treatment and vocational settings. He has also managed functional rehabilitation programs for adults and children who are served by multiple systems including treatment foster care. Michael specializes in behavioral programming that blends natural support and specialized support systems.
